2016	New product: Sugo for Kids in three different falvours

Where we are...

### Our production plants

Located in Northern Italy, in the province of *Parma*, the so-called "**Food Valley**", we have <u>3 production plants</u>:

1) Ozzano Taro: specialized in the production of chopped and crushed tomatoes, tomato based sauces, tomato paste and tomato powder

2) **Castelguelfo:** specialized in the industrial production of pizza sauces and tomato paste in aseptic bags (it has brand new facilities for aseptic drums)

which produces chopped and crushed tomatoes, tomato paste, dried vegetables, wine powder and confectionery products.

# Rodolfi: a company on the move

- € 68 mio turnover in 2017
- About 110 full time workers up to 400 seasonal workers during the crop
- Food service, retail & private label markets are growing

# + € 2 mio/year invested in R&D

We constantly update our production technologies and we dedicate time and resources for researching and developing new products.

That's why we are one of the leading tomato processing companies in the world!

#### Internationalization

We export towards more than 70 countries all around the world

Ourproducts

#### Four brands - Same quality

Rodolfi in able to offer a complete range of products, including tomato paste, chopped and crushed tomatoes, tomato based sauces, tomato powder, basic for pesto, dried vegetables, wine powder and confectionary products

### **Ortolina**

#### ... where it began

Ortolina: the taste of freshly-plucked vegetables, from the garden to your kitchen!

In 1936 an old homemade recipe gives birth to the idea of Ortolina. Virginia, Mansueto's wife, was given a recipe by a friend of hers, for cooking a sauce with tomatoes and vegetables. Ida used to serve it at dinners on sunday and festive occasions, to flavour boiled meat. Mansueto came up with the idea of manufacturing this tasty sauce.

Ortolina was the first ready sauce on the market. In the slogan "I'orto in cucina" was conveyed at the same time the idea of a home made and genuine product.

Since then almost nothing has changed.

Old people still refer to "Ortolina" as one of the oldest and most successful products on the market.

#### **Energy sustainability**

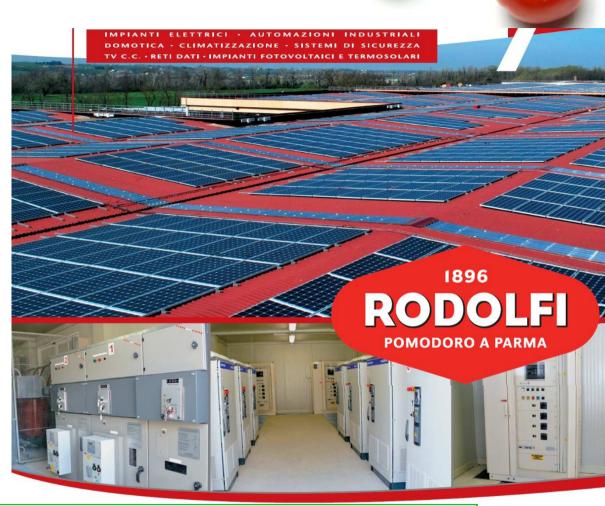

#### PHOTOVOLTAIC SYSTEM

A **8.000** m<sup>2</sup> photovoltaic energy system has been installed in 2011 on the rooftop of our warehouses.

The features of this system are the followings:

- 929,28 kWp total power
- 3.872 modules installed
- 1.000.000 kWh produced per year, such as 13% of Rodolfi total consumption of electricity.

This photovoltaic energy plant allows to reduce the carbon emission of 520.000 kg/year

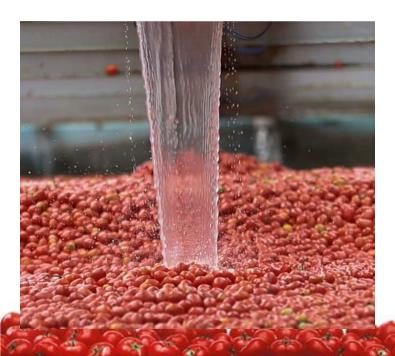

#### Water sustainability

#### WATER RECYCLING SYSTEM

An advanced **system of filtration** and purification allows to recycle the water used for preliminary processing activities, such as unloading and transportation of tomatoes.

#### Thanks to this system:

- Approx. 70% of total water consumption comes from recycled sources
- Water consumption is reduced by 300.000/ 400.000 CBM/year

Rodolfi continuously monitors the quantity and the quality of filtrated and purified water!

### The future

- New Products:
  - Flavored Pizza Sauce
  - Sugo Rodolfi
  - Pesto
  - Squeezer
- New Markets:
  - Now 70 countries
  - Future: more than 100 in the next 2 years
